CRUSHING EQUIPMENT LIST

- - Jaw Crushing
- - JC Series Jaw Crushers
- - Impact Crushing
- - CS Cone Crushers
- - Hydraulic Cone Crushers
- - Spring Cone Crushers
- - HCS90 Cone Crushers
- - VSI Crushers
- - Jaw mobile crushing equipment
- - Impact mobile crushing equipment
- - Cone mobile crushing equipment
- - YGFS Multi-crushing equipment

GRINDING EQUIPMENT LIST

- - MTW Trapezium Mill
- - LM Vertical Mill
- - MTM Trapezium Mill
- - High Pressure Suspension Mill
- - MXB Coarse Powder Mill
- - SCM Series Super Thin Mill
- - Raymond Mill
- - Ball Mill

◆ Mining Equipment : MXB Series Coarse Powder Mill

[MXB Series Coarse Powder Mill Overview] MXB Coarse Powder Mill is a kind of new high-tech milling machine to meet the requirements of coarse powder processing customers. It is the ideal equipment to replace Raymond Mill, ball mill and other traditional mill. MXB Coarse Powder Mill is a kind of new high-tech milling machine to meet the requirements of powder processing customers. Based on our experts' many years research experience in the milling industry and considering recommendations and requirements of domestic and foreign clients, it is the ideal equipment to replace Raymond Mill, Ball Mill and other traditional [grinding mills](#) which only process fine powder materials.

[MXB Series Coarse Powder Mill Application] MXB Coarse Powder Mill is used for pre-processing of various crushable non-flammable and non-explosive brittle materials with Mohs under 9. It is widely applied in quartz sand, silica sand, foundry sand, fine sand and other sand abrasive industry. It is also applied in industries of mining, construction, metallurgic, road building and water conservancy etc.

[MXB Series Coarse Powder Mill Main Features and Benefits] High efficiency of wear material, wear evenly, the lifetime is three times higher than that of Raymond Mill; High percentage of sand can be produced by this machine
1. High efficiency of spare parts. As materials fall from top to bottom, roller and ring are equally worn. Thus the life span could be 3 times higher than that of Raymond Mill. 2. High efficiency of processing fine sand. 80% of the finished sand could be finer than 1-2mm. 3. This machine could be used as the pre-grinding equipment before ball mill so as to increase Ball Mill efficiency by 50%. 4. Products out of MXB coarse powder mill can be used to make firebrick, [ore](#), concrete brick, block and other new building materials 5. Mainly used for pre-processing of various crushable non-inflammable and non-explosive brittle material with Mohs Hardness less than nine.

MXB Coarse Powder Mill Specifications:

Name/Parameter/Product	Model
	MXB904
Roller quantity(pcs)	4
Max. feeding size(mm)	<30
Product size(mm)	70-90% <2
Capacity(ton/hour)	8-15
Main motor power(kw)	37-45
Overall size(m)(LxWxH)	2.01x2.03x2.79
Total weight (excluding electricity control cabinet)(ton)	13.7

Optional Equipment

Jaw crusher	JC250x1000	speed ≥ 1m/s
Power(kw)	30	
Bucket elevator	TH250	
Power(kw)	3	
Vibrating feeder	GZ3F	Space between inlet and outlet is 1000
Power(kw)	0.2	

Note: This specification is just reference, any changes are subject to the products.
