### CRUSHING EQUIPMENT LIST

- Jaw Crushing
- JC Series Jaw Crushers
- Impact Crushing
- CS Cone Crushers
- Hydraulic Cone Crushers
- Spring Cone Crushers
- HCS90 Cone Crushers
- VSI Crushers
- Jaw mobile crushing equipment
- Impact mobile crushing equipment
- Cone mobile crushing equipment
- YGFS Multi-crushing equipment

### GRINDING EQUIPMENT LIST

- MTW Trapezium Mill
- LM Vertical Mill
- MTM Trapezium Mill
- High Pressure Suspension Mill
- MXB Coarse Powder Mill
- SCM Series Super Thin Mill
- Raymond Mill
- Ball Mill

## VSI crusher, Sand Making Machine

### ◆ Mining Equipment : VSI crusher, Sand Making Machine, VSI5X

**[ SBM-VSI crusher (Hydraulic): ]** SBM VSI crusher is designed by reputed German expert of Shibang and every index of VSI crusher is in world's leading standard. SBM VSI crusher incorporates three crushing types and it can be operated 720 hours continuously. Nowadays, VSI crusher has replace hammer crusher roller crusher, roller ball mill, etc. and become the mainstream equipment in sand making business.

**Technological advantages:** VSI crusher incorporates three crushing styles; its feeding style incorporates material on material, materials on iron and falling at sides. Customers can adjust the machines according to their own demand. VSI crusher realizes multiple functions in one machine, which is a big breakthrough in sand making field.

**[ Vertical Shaft Impact Crusher (Sand Making Machine): ]** Vertical Shaft Impact Crusher is applied widely for the powder process of mineral product including metal and non-metal ore, fireproof material, bauxite, diamond dust, glass raw materials, architectural materials, artificial sand and all kinds of metal ore materials, especially which has more advantages than any other machines in processing the more and most hard materials.

**Benefits & Features:** 1. Simple structure, low cost 2. High efficiency and low consumption 3. Primary and second crushing capacity 4. More and most hard materials can be crushed 5. Cubic shaped final product 6. Little noise and dust pollution 7. Convenient performance, maintenance, installation

**[ VSI5X Series Vertical Shaft Crusher: ]** VSI5X series crushers are widely used in metal and nonmetal mine, concrete, fireproof material, abrasive filler, frit, construction aggregate, sand, metallurgy and so on. VSI5X series crushers are applied to medium-fine crush all of the ore and rock such as iron ore, nonferrous metal, emery, bauxite, granite and so on.

**VSI5X Benefits:** VSI5X series vertical shaft crushers adopt Germanic advanced technique and obtain many proprietary intellectual property rights and the patent technology as well as integrate with three types of crushing who have been the core equipments in sand making industry

VSI5X Series Vertical Shaft Crusher Key Specification:
